**PART I**                    **THE EXAMINER'S EVALUATION OF THE APPLICATION**

**SECTION A**            **RELEVANT ART CITED BY THE EXAMINER**

1.     U. S. Patent No. 5,802,394 A to Baird et al. describes Method for accessing one or more streams in a video storage system using multiple queues and maintaining continuity thereof.
2.     U. S. Patent No. 5,586,264 A to Belknap et al. describes Video optimized media streamer with cache management.
3.     U. S. Patent No. 6,496,899 B1 to DeMoney describes Disk scheduling system with bounded request reordering.

**SECTION B**            **DISTINGUISHING FEATURES RECITED IN THE CLAIMS**

The following is an Examiner's Statement of Reasons for Allowance See **MPEP 1302.14**

4.     The primary reasons for allowance of independent claims 1-18 in the instant application is the combination with the inclusion of following limitations: starting a breathing cycle; (c) determining if one of the following becomes true before the end of P time units: (i) a number of real-time requests is at least a predetermined threshold based on a number of data streams and performance parameters of the storage device; and (ii) a number of pending requests for any single stream becomes more than one; (d) if at least one of (i) and (ii) remain true during the duration of P time units from the start of the breathing cycle, starting a subsequent breathing cycle after completion of the breathing cycle; and (e) if

**both of (i) and (ii) are not true during the duration of P time units from the start of the breathing cycle, waiting P time units from the start of the breathing cycle before starting the subsequent breathing cycle.**

5. *The primary reasons for allowance of independent claim 19 in the instant application is the combination with the inclusion of following limitations: **starting a breathing cycle; (c) determining if one of the following becomes true before the end of P time units: (i) a number of real-time requests is at least a predetermined threshold based on a number of data streams and performance parameters of the storage device; and (ii) a number of pending requests for any single stream becomes more than one; (d) if at least one of (i) and (ii) remain true during the duration of P time units from the start of the breathing cycle, starting a subsequent breathing cycle after completion of the breathing cycle; and (e) if both of (i) and (ii) are not true during the duration of P time units from the start of the breathing cycle, waiting P time units from the start of the breathing cycle before starting the subsequent breathing cycle.***

6. *The primary reasons for allowance of independent claim 20 in the instant application is the combination with the inclusion of following limitations: **b) computer readable program code means for starting a breathing cycle; (c) computer readable program code means for determining if one of the following becomes true before the end of P time units: (i) a number of real-time requests is at least a predetermined threshold based on a number of data streams and performance parameters of the storage device; and (ii) a number of pending requests for any***

single stream becomes more than one; (d) computer readable program code means for if at least one of (i) and (ii) remain true during the duration of P time units from the start of the breathing cycle, starting a subsequent breathing cycle after completion of the breathing cycle; and (e) computer readable program code means for if both of (i) and (ii) are not true during the duration of P time units from the start of the breathing cycle, waiting P time units from the start of the breathing cycle before starting the subsequent breathing cycle.

*The prior art of record including the disclosures of Baird et al. (5,802,394 A), Belknap et al. (5,586,264 A), and DeMoney (6,496,899 B1) neither anticipates nor renders obvious the above recited combination.*

*Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays should be clearly labeled "Comments on Statement of Reasons for Allowance"*
